Exit Meeting Date: 2022-06-03

The following report provides a summary of the results of the Children in Extended Society Care Review (CESCR). It is based on the following tools:

- Children in Extended Society Care Review - Individual Case Report
- Children in Extended Society Care Review - Adoption Probation - Individual Case Report

Findings for each tool are presented in relation to:

- Compliance by Requirement;
- Compliance Summary
- Supplementary Information
- Outcome Measures

Colour coding shown on the "Compliance by Requirement" table indicates compliance results according to ranges of achievement:

- Gold for 'full' compliance at 100%;
- Green for 'high' compliance - 75% to 99%;
- Yellow for 'moderate' compliance - 51% to 74%;
- Red for 'low' compliance - 50% or less.

Results related to positive outcomes for children are identified by:

- 'S' for child safety;
- 'P' for permanency;
- 'W' for wellbeing.

A. Children in Extended Society Care Review

The annual Children in Extended Society Care Review (CESCR) is undertaken by the Ministry of Children, Community and Social Services' Children in Extended Care Review Unit (CECRU), in co-operation with each children's aid society or Indigenous children's aid society (society) and ministry regional offices. The purpose of the review is to determine if the placement, services, educational and social needs of children in extended society care in Ontario are being identified and appropriately addressed. The CESCR is an accountability mechanism used by the ministry to determine if children's aid societies are undertaking appropriate planning and services for each child reviewed. The review monitors compliance with legislation and requirements related to the care of children.

The objectives of the CESCR are:

- To monitor society compliance with the *Child, Youth and Family Services Act (CYFSA)* and its requirements in relation to the care of each child reviewed;
- To look for adequate assessment of needs, suitable placement, supporting services, and realistic planning for and with the child reviewed;
- To issue directives regarding non-compliance and to make recommendations concerning service provision in selected specific areas as appropriate;
- Using a strengths-based approach, identify and convey to societies the strengths of service delivery.

B. Philosophy and Guiding Principles

The CESCR process is in keeping with the principles identified in the *CYFSA*:

- A strengths and outcomes based approach to case planning;
- A recognition of children's need for continuity with family, community and culture;
- A commitment to best practice including a focus on child safety, permanency and wellbeing.

The CESCR process supports and promotes:

- Continuous quality improvement;
- Balanced reporting;
- Accountability;
- Transparency;
- An accurate reflection of society performance.

The CESCR process is part of a continuous quality improvement cycle with the expectation being that, over time, societies will strive to improve performance from one review to the next using the information collected from each review.

The CESCR findings are based on the review of society files. In complex and/or high-risk cases, society caseworkers and managers may also be consulted. Each case file is reviewed in the year following 24 months of successive extended care status and every year after that.

C. Children in Extended Society Care Review - Adoption Probation

The files of children placed on Adoption Probation are reviewed with the Children in Extended Society Care Review Adoption Probation (CESCR AP) tool if they have been children in extended society care for more than 24 months.

Profile of Children in Extended Society Care on Adoption Probation

A total of 1 child was reviewed:

0 Males

1 Female

A total of 1 child or 100.0% were identified as First Nations, Inuit and/or Métis children/youth with status or eligible for status federal *Indian Act*.
